L'isola, dalle ante in termo strutturato grigio scuro, contempla numerose possibilità di attrezzare con capienti cestoni scorrevoli diverse funzioni attraverso accessori interni che qualificano il servizio di una cucina che deve saper tenere in ordine oggetti di uso quotidiano. Gli interni dei cassetti rivestiti in termo strutturato penelope o attrezzati in legno, sottolineano la cura del dettaglio che non può prescindere dalla qualità di un prodotto e dalla bellezza del Made in Italy. // The island, with thermo-structured dark grey doors, can be equipped with spacious sliding baskets and offers different functions through internal accessories that allow a tidy kitchen with neatly arranged everyday objects. The insides of drawers, covered with thermo-structured Penelope material or wood details, express the attention to detail typical of the quality and the beauty of a product Made in Italy. // L'île, avec ses portes en thermo-structure gris foncé, permet de nombreuses possibilités d'équipement avec de spacieux paniers coulissants à fonctions diverses grâce à des accessoires internes définissant le service d'une cuisine qui doit savoir tenir en ordre les objets de tous les jours. L'intérieur des tiroirs revêtu en thermo-structuré Penelope ou équipés en bois, souligne l'attention accordée au détail, laquelle est indissociable de la qualité d'un produit et de la beauté du Made in Italy. // La isla, de las puertas en térmico estructurado gris oscuro, contempla muchas posibilidades de equipar con grandes cestas correderas diferentes funciones a través de accesorios interiores que cualifican el servicio de una cocina que tiene que saber conservar en orden objetos de uso diario. El dentro de los cajones revestidos en térmico estructurado penelope o equipados de madera, subrayan el cuidado respecto a los detalles que no puede prescindir de la calidad de un producto y de la belleza del Made in Italy. // Остров с дверцами в темно-серой термоструктурированной отделке предлагает множество вариантов для оснащения вместительными многофункциональными выдвижными корзинами с помощью внутренних приспособлений, что повышает функциональность кухни для содержания в порядке предметов повседневного обихода. Внутренние части выдвижных ящиков в термоструктурированной отделке Penelope или в деревянной отделке подчеркивают внимательное отношение к деталям, традиционно присущее качеству и красоте изделий под маркой "Made in Italy".

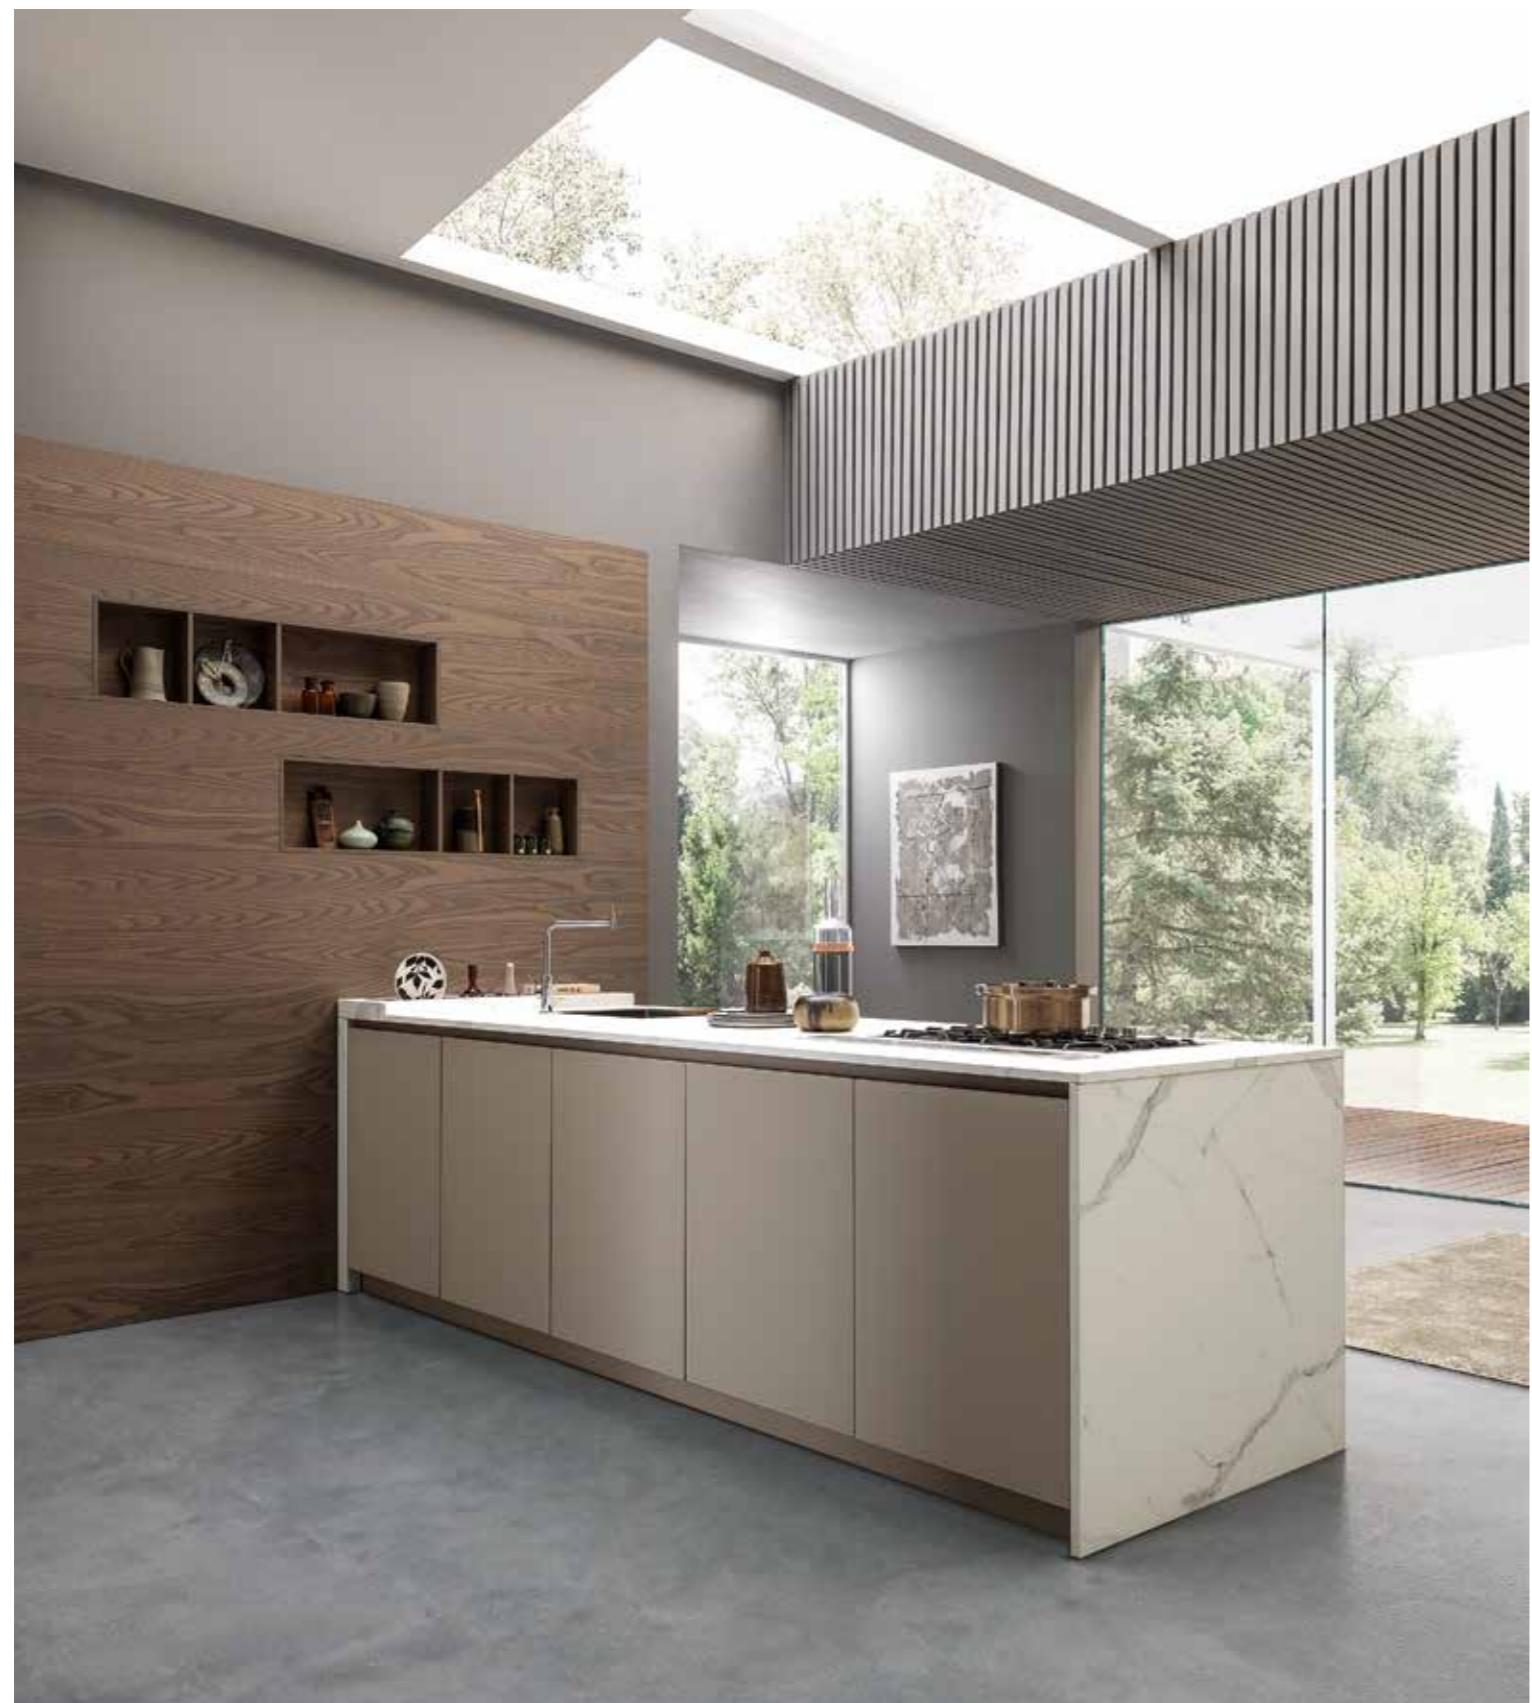

In questa soluzione Arkè gioca attraverso geometrie e simmetrie funzionali a valorizzare spazi contenitivi organizzati. L'esempio più originale è la soluzione che trasforma la cappa a trave in termostrutturato ossido in un comodissimo pensile dedicato alle spezie o piccoli oggetti di uso quotidiano. Il cassetto interno è dotato di un pratico sistema di trascinamento, che ne consente l'apertura insieme al cestello. // In this solution, Arkè plays with geometry and functional symmetry to enhance organized storage spaces. The most original example of this is given by the solution that converts the thermo-structured oxide beam hood to a practical wall unit to store spices or small items of daily use. The internal drawer is equipped with practical rails that allow it to be opened together with the basket. // Dans cette solution, Arkè joue avec des géométries et des symétries fonctionnelles à valoriser les espaces de rangement organisés. L'exemple le plus original est la solution transformant la hotte poutres en thermo-structuré Oxyde en un meuble suspendu très pratique dédié aux épices ou aux petits objets d'usage quotidien. Le tiroir interne est équipé d'un pratique système d'entraînement, permettant son ouverture en même temps que le coulissant. // En esta solución Arkè juega con las geometrías y las asimetrías funcionales para valorizar los espacios de contención organizativos. El ejemplo más original es la solución que transforma la campana en viga en térmico estructurado óxido en un colgante muy cómodo dedicado a las especias o a pequeños objetos de uso diario. El cajón interno dispone de un cómodo sistema de arrastre, que no permite la abertura junto con la cesta. // В этом решении Arkè использует практичность геометрических форм и симметрии для повышения функциональности организованных пространств для хранения. Одним из наиболее оригинальных примеров является решение, в котором вытяжка на горизонтальной подвесной панели в термоstructuredированной отделке с эффектом окисления преобразуется в подвесной шкаф, чрезвычайно удобный для хранения специй и небольших предметов повседневного обихода. Внутренний выдвижной ящик оснащен практической системой извлечения, обеспечивающей его открывание вместе с корзиной.

Se la boiserie nasce come elemento architettonico a supporto dell'isola, in essa si concentrano molte funzioni collegate e integrate. La cottura ed il lavaggio sono punti chiave dell'operatività in cucina, ma ciò che rende un'isola davvero speciale è la capacità di organizzare attraverso cassetti, vani e cestoni spazi sempre più ricchi di optional che rappresentano un autentico valore aggiunto, come l'elemento in acciaio inserito sul top composto da portapiatti, portabottiglie e taglieri, apprezzati da chi la cucina la vive ogni giorno e per questo ne riconosce il valore. // Although the wood panelling was initially meant as an architectural element in support of the island, it includes many linked and integrated functions. Cooking and washing operations are key points in the kitchen, but what really makes an island special is the ability to be organized with additional drawers, compartments and baskets rich of options that represent real added value, such as the steel dish racks, bottle racks and cutting boards inserted on the top, appreciated by those who live the kitchen every day and recognize its value. // Si les boiseries naissent comme un élément architectural en support de l'île, elle contiennent également de nombreuses fonctions connexes et intégrées. La cuisson et le nettoyage sont des points opérationnels clés de la cuisine, mais ce qui rend une île toute particulière est la capacité d'organiser, par le biais de tiroirs, compartiments et coulissants, des espaces plus riches d'options représentant une réelle valeur ajoutée, tels que l'élément en acier inséré sur le top composé de porte-plats, porte-bouteilles et planches à découper, appréciés par qui vit quotidiennement la cuisine et en reconnaît la valeur.

// Si la boiserie nace como un elemento arquitectónico en ayuda de la isla, en ésta se concentran muchas funciones conectadas e integradas. La cocción y el lavado son punto llave de la funcionalidad en la cocina, pero lo que convierte a una isla en algo de realmente especial es la capacidad de organizar a través de cajones, espacio y cestas, más ricos de optionales que representan un valor añadido auténtico, como el elemento de acero introducido en la encimera y formado por portaplatos, portabotellas y tajaderas, apreciados por quienes viven la cocina cada día y, por esto, aprecian el valor. // Если декоративная панель является архитектурным элементом, дополняющим остров, то в самом острове сконцентрированы связанные между собой и интегрированные функции. Приготовление пищи и мойка являются ключевыми операциями, выполняемыми на кухне; но то, что делает остров действительно особенным – это возможность посредством ящиков, секций и корзин упорядочить пространства, насыщенные дополнительными элементами, повышающими функциональность композиции, такими как стальной элемент, установленный на столешнице, состоящий из стеллажей для хранения тарелок, бутылок и разделочных досок – приспособлений, которые по достоинству оценият те, кто ежедневно проводят время на кухне и поэтому ценят предлагаемые ею удобства.

Il grande vantaggio della soluzione ad isola è quello di avere a disposizione ampi volumi di contenimento per un servizio a 360° nell'ambiente. Lo dimostrano l'organizzazione dei cestoni attrezzati dotati di optional interni in metallo e legno, ideali per il mantenimento dell'ordine interno. L'anta è disegnata con taglio verticale a 45°, un gioiello estetico che consente una chiusura perfetta sulle basi in finitura Fenix. // The great advantage of the island is that it has large cupboards, which allow a full-spectrum service. This is proved by the way the accessorised baskets are organized with optional metal and wood interiors, ideal for keeping everything inside tidy. The door is designed with a vertical cut at 45°, an aesthetic gem that allows the Fenix finish base units to close perfectly. // Le grand avantage de la solution à île est de disposer de grands volumes de rangement pour un service à 360°. Ceci est démontré par l'organisation des paniers équipés avec options internes en métal interne et en bois, parfaits pour maintenir l'ordre interne. La porte est conçue avec une coupe verticale à 45°, un bijou esthétique qui permet une fermeture parfaite sur les placards bas avec finitions Fenix. // La grande ventaja de la solución a isla es de disponer de amplios volúmenes de almacenar para un servicio a 360°en el ambiente. Lo demuestran la organización de las cestas equipadas de opcional internos de metal y de madera, ideales para guardar el orden interior. La puerta ha sido dibujada con corte vertical de 45°, una joya estética que permite un cierre perfecto de los bajos en acabado Fenix. // Большим преимуществом острова является возможность располагать просторными местами для хранения предметов с обеспечением доступа на 360 °. Это доказывает расположение корзин, оснащенных дополнительными внутренними элементами из металла и дерева, идеально подходящих для поддержания внутреннего порядка. Дверца разработана с вертикальным срезом под углом 45 °; это замечательное эстетическое решение обеспечивает безукоризненное смыкание на базовых секциях в отделках Fenix.

La cucina si arricchisce di soluzioni "double face" estremamente originali, come le colonne a vetri con profilo finitura titanio che, se da un lato si presenta come un elegante espositore, dall'altro consente l'accesso ad un'ampia cabina attrezzata a dispensa. // The kitchen is enriched with extremely original "double face" solutions, like the glass columns with a titanium finish, which, while looking like an elegant display, also provide access to a large accessorised pantry. // La cuisine est enrichie de solutions « double face » très originales, telles que les colonnes à vitres au montant finitions titane qui, si elles se présentent d'une part comme une vitrine, permet dans tous les cas l'accès à un vaste placard équipé. // La cocina se enriquece de soluciones "doble cara" muy originales, como las columnas de cristales con perfil acabado titanio que, si por un lado se presenta con un mostrador elegante, por el otro permite el acceso a una amplia cabina equipada como despensa.

// В кухне используются весьма оригинальные решения «двойной стороны», такие как колонны со стеклом с профилем в титановой отделке, которые с одной стороны выполняют роль элегантной выставочной витрины, а с другой – обеспечивают доступ к просторному отсеку, оборудованному под кладовую.

Servire vini di qualità alla perfetta temperatura è una prerogativa di chi pensa alla cucina come un luogo dell'ospitalità. Una "wineceller" d'avanguardia con ante acciaio e vetro si attrezza con numerosi ripiani per l'alloggiamento delle bottiglie, la temperatura è regolabile elettronicamente secondo la tipologia del vino che si intende conservare e servire. // Serving quality wines at the perfect temperature is the prerogative of those who think of the kitchen as a place of hospitality. An avant-garde "wine cellar" with steel and glass doors is equipped with numerous shelves to accommodate the bottles, the temperature is controlled electronically according to the type of wine to be stored and served. // Servir des vins de qualité à la température idéale est l'apanage de qui pense la cuisine comme un lieu d'hospitalité. Une cave à vin d'avant-garde avec des portes en acier et en verre, équipée de nombreuses étagères pour le rangement des bouteilles. La température est contrôlée par un système électronique en fonction du type de vin à conserver et servir.

// Ofrecer vinos de calidad a una temperatura perfecta es una prerrogativa de quienes piensan en la cocina como a un lugar de hospitalidad. Una "winecellar" de vanguardia con puertas de acero y cristal se equipa con muchos entrepelos para acoger a las botellas, la temperatura se puede ajustar eléctricamente de acuerdo con la tipología de vino que deseamos conservar y servir. // Подача качественных вин при идеальной температуре является прерогативой тех, кто думает о кухне как о месте для проявления гостеприимства. Изготовленный по передовым технологиям винный шкаф со стальными и стеклянными дверцами оснащен многочисленными полками для размещения бутылок; температура в нем регулируется электроникой в зависимости от типа вина, которое вы собираетесь хранить и подавать.

# PROJECT MANAGEMENT

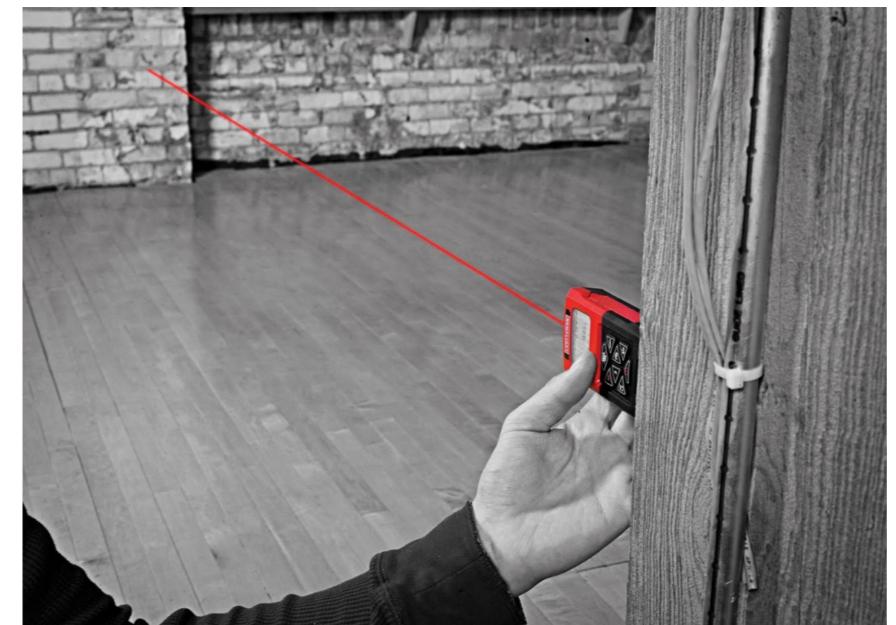

BY OFFICINE LINGOTTO

Our team of experts provide knowledgeable advice and expertise in the field.

Officine Lingotto provides structure that facilitates the coordination and implementation of project activities. Its main reason is to create an environment that fosters interactions among the team members with a minimum amount of disruptions, overlaps and conflict. One of the important decisions of project management is the form of organizational structure that will be used for the project.

We understand that Project Management Consulting (PMC) services for large, complex projects require expertise in oversight, participant interface and accountability. Our experienced PMC team can monitor, assess, advise and report on every phase of the project to ensure your interests and business objectives are met in the most cost-effective and timely manner.

One of the main objectives of the structure is to reduce uncertainty and confusion that typically occurs at the project initiation phase. The structure defines the relationships among members of the project management and the relationships with the external environment. The structure defines the authority by means of a graphical illustration called an organization chart.

Specialization affects the project structure by the degree of specialty in technical areas or development focus; projects can be highly specialized and focus on a specific area of development, or have different broad specializations in many areas of development.
